

# n8n Workflow Evidence

Brief automation evidence pack.

Project	SmartIoT Network Infrastructure Project
Team	SmartIoT Project Team
Prepared by	Rui Ferns
Supervisor / Assessor	Paul Butters
Date	May 2026

## 1. Evidence Summary

n8n was used to demonstrate automation in the SmartIoT project. The workflows can receive webhooks, process data and support alerting or VM portal actions.

## 2. Example Workflows

Workflow	Purpose	Evidence to show
Zabbix alert workflow	Receives or handles monitoring alert information.	Webhook/trigger node and output data.
Ticketing workflow	Sends incident data towards the ticketing process.	HTTP/email/Zammad action node.
VM access workflow	Provides VM access output or demo response.	Webhook URL and response node.
Notification workflow	Sends a message/email for project demonstration.	Successful execution log.

## 3. What Was Demonstrated

- Use of webhook/test URL.
- Use of workflow nodes and connections.
- Successful manual test execution.
- Automation evidence connected to monitoring/ticketing/portal work.

## 4. Screenshots to Add

**Screenshot placeholder:** n8n workflow canvas

**Screenshot placeholder:** Webhook node settings

**Screenshot placeholder:** Respond to Webhook node

**Screenshot placeholder:** Successful execution output
